

# TABLE OF CONTENTS

SCOPE AND PURPOSE .....	1
ACKNOWLEDGMENTS .....	2
HOW PLASTICS ARE MADE .....	3
Introduction .....	3
Why Plastics? .....	3
History of Plastics .....	4
How Plastics Are Processed .....	4
Polymerization .....	4
MONOMERS .....	5
HOMOPOLYMERS .....	5
COPOLYMERS .....	5
TERPOLYMERS .....	5
Molecular Weight .....	5
Crystalline and Amorphous Materials .....	6
Thermoplastic and Thermoset Materials .....	7
PROCESSING TECHNIQUES .....	8
Manufacturing Thermoplastics and Thermosets .....	8
Injection Molding .....	8
Extrusion .....	8
Ram Extrusion .....	9
Melt Extrusion .....	9
Coextrusion .....	9
Paste Extrusion .....	9
Casting .....	9
Compression Molding .....	9
Rotational Molding .....	10
Transfer Molding .....	10
Calendering .....	10
Hand (or Spray) Lay-Up .....	10
Laminating .....	10
Filament Winding .....	11
Polymer Orientation .....	11
MACHINABILITY: FABRICATION TECHNIQUES FOR STOCK SHAPES .....	12
Machining .....	12
Flat Sheet Fabricating .....	12
Thermoforming .....	12
Vacuum Forming .....	13
Pressure Forming .....	13
Membrane Pressing .....	13
Welding .....	13
Bonding .....	14
Tolerances .....	14
Fabrication Methods .....	14
PIPE, VALVES AND FITTINGS .....	16
Thermoplastic Piping Systems .....	16
Thermoplastic Piping Systems Applications .....	16
Drain Piping .....	17
Schedule 40 .....	17
Schedule 80 .....	17
Schedule 120 .....	17

Standard Dimensional Ratio (SDR).....	17
Bar Rating.....	17
Valves.....	18
Ball Valve.....	18
Butterfly Valve.....	18
Diaphragm Valve.....	18
Gate Valve.....	18
Ball Check Valve.....	18
Swing Check Valve.....	18
Pressure Regulator Valve.....	19
Pressure Relief Valve.....	19
Vacuum Breaker Valve.....	19
Fusion Techniques.....	19
Solvent Cementing.....	19
Butt Fusion.....	19
Socket Fusion.....	19
Bead and Crevice Free Fusion.....	20
Electrofusion.....	20
Stick Welding.....	20
Epoxy Cementing.....	20
Mechanical Joining.....	20
<b>TUBING.....</b>	<b>21</b>
Definitions.....	21
Tubing (single/multi-lumen/heat shrink/spiral cut/convoluted/corrugated).....	21
Profiles.....	21
Why Tubing?.....	21
Primary Materials.....	22
Tubing – Flexible and Rigid.....	22
Polyolefins (PP).....	22
Nylons.....	22
Vinyls.....	22
Fluoropolymers.....	22
PEEK.....	23
Material Selection.....	23
<b>PROPERTIES OF PLASTICS.....</b>	<b>24</b>
Mechanical and Physical Properties of Plastics.....	24
Design.....	24
Stress.....	24
Stiffness (Modulus).....	24
Strain.....	25
Yield Point.....	25
Tensile Strength.....	25
Elongation.....	26
Compressive Strength.....	26
Shear Strength.....	26
Flexural Strength.....	26
Torsional Strength.....	27
Poisson’s Ratio.....	27
Creep.....	28
Fatigue Strength.....	30
Impact Strength.....	30
Notch Sensitivity.....	31
Melt Index.....	31
Specific Gravity.....	32
Water Absorption.....	32
Glass Transition Temperature.....	32
Thermal Properties of Plastics.....	32
Coefficient of Expansion.....	32
Deflection Temperature Under Load.....	32
Thermal Conductivity.....	33
Electrical Properties of Plastics.....	33
Volume Resistivity.....	33
Surface Resistivity.....	33

Dielectric Constant	33
Dielectric Strength	34
Dissipation Factor	34
Arc Resistance	34
Electromagnetic Interference (EMI) and Radio Frequency Interference (RFI)	34
Optical/Colorability Properties of Plastics	35
Enhancing the Properties of Plastics	35
Additives (Improve Specific Properties)	35
Reinforcements (Improve Strength)	35
Colorants (Change Appearance)	35
Effects of the Environment on Plastics	35
Wear Characteristics of Plastics	36
Material Selection	36
What load will the part have to carry?	36
Will the part have to withstand impact?	37
Will the part see cyclic loading (fatigue)?	37
What temperatures will the part see and for how long?	37
Will the material be exposed to chemicals or moisture?	37
Will the material be used in an electrical design?	37
Will the material be used as a bearing or need to resist wear?	37
Does the part have to retain its dimensional shape?	37
Will the material have to stretch or bend a lot?	37
Will the part have to meet any regulatory requirements?	37
Does the material or film have to prevent certain gases or liquids from passing through?	37
Will the part be exposed to any radiation?	37
Does the material need to have a special color and/or appearance?	38
Does the part have any optical requirements?	38
Will the part be used outdoors?	38
Can any volatiles be given off by the material?	38
<b>MATERIALS</b>	<b>39</b>
Acetal (POM)	39
Acrylic (PMMA)	40
Acrylic Rod and Tube Processes and Product Types	41
Acrylics' Properties	41
Acrylonitrile-Butadiene-Styrene (ABS)	42
Amino	42
Cellulosics	42
Epoxy	44
Ethylene-Chlorotrifluoroethylene (ECTFE)	44
Ethylene Tetrafluoroethylene (ETFE)	44
Ethylene-Vinyl Acetate (EVA)	45
Fluorinated Ethylene Propylene (FEP)	45
Industrial Laminates	46
Epoxy Grades of Industrial Laminates	46
Melamine Grades of Industrial Laminates	46
Silicone Grade Industrial Laminates	47
Polyester Grades of Industrial Laminates	47
Industrial Thermosets (Phenolics) Paper Grades of Industrial Laminates	47
Industrial Thermosets (Phenolics) Cotton Grades of Industrial Laminates	47
Ionomer	48
Liquid Crystal Polymers (LCP)	48
Nylon (PA)	49
Nylon, Cast	50
Cast Nylon Type 12 and Type 6/12	51
PCT/PCTG/PCTA (Glycol Modified Polyesters)	51
Perfluoroalkoxy (PFA)	51
Phenolics (Industrial Thermosets)	52
Polyallomer	52
Polyamide-Imide (PAI)	52
Polyarylates (PAR)	53
Polyaryletherketone (PAEK)	54
Polyarylethersulfone (PAES)	54
Polyarylsulfone (PAS)	54

Polybutylene (PB) . . . . .	54
Polybutylene Terephthalate (PBT) . . . . .	54
Polycarbonate (PC) . . . . .	55
Polychlorotrifluoroethylene (PCTFE) . . . . .	56
Polyester Terephthalate Glycol Modified (PETG Copolymer) . . . . .	56
Polyesters, Thermoplastic . . . . .	57
Polyesters, Thermoset . . . . .	57
Polyetheretherketone (PEEK) . . . . .	59
Polyetherimide (PEI) . . . . .	59
Polyethersulfone (PES) . . . . .	61
Polyethylene (PE) . . . . .	61
Low-Density Polyethylene (LDPE) . . . . .	61
Medium-Density Polyethylene (MDPE) . . . . .	61
High-Density Polyethylene (HDPE) . . . . .	62
Ultra-High Molecular Weight Polyethylene (UHMW-PE) . . . . .	62
Polyethylene Terephthalate (PET/PETE) . . . . .	62
Polyimide (PI) . . . . .	63
Polymethyl Pentene (PMP) . . . . .	64
Polyphenylene Ether, Modified (PPE) . . . . .	64
Polyphenylene Sulfide (PPS) . . . . .	64
Polypropylene (PP) . . . . .	66
Polystyrene (PS) . . . . .	67
Polysulfone (PSU) . . . . .	67
Polytetrafluoroethylene (PTFE) . . . . .	67
PTFE, Chemically Modified . . . . .	68
Polytetrafluoroethylene-Perfluoromethylvinylether (MFA) . . . . .	68
Polythramethylene Terephthalate (PTMT) . . . . .	68
Polyurethane (PU) . . . . .	68
Manufacturing . . . . .	68
Shapes Processing . . . . .	69
Characteristics . . . . .	69
Markets and Applications . . . . .	69
Polyvinyl Chloride (PVC) . . . . .	70
Polyvinyl Chloride, Chlorinated (CPVC) . . . . .	71
Polyvinyl Fluoride (PVF) . . . . .	72
Polyvinylidene Fluoride (PVDF) . . . . .	72
PVC/Acrylic Alloy Sheet . . . . .	73
Styrene Maleic Anhydride-Polycarbonate (SMA-PC) Blends . . . . .	73
Styrene Acrylonitrile Copolymer (SAN) . . . . .	73
Thermoplastic Elastomer (TPE) . . . . .	74
Vinyl . . . . .	75
Vulcanized Fibre . . . . .	75
MATERIAL ABBREVIATIONS . . . . .	77
MATERIAL PROPERTY TABLES . . . . .	78
HOW TO IDENTIFY PLASTICS . . . . .	125
IAPD THERMOPLASTICS RECTANGLE . . . . .	127
TESTING ORGANIZATIONS . . . . .	129
TEST YOUR KNOWLEDGE . . . . .	130
TRADE NAMES . . . . .	131
BIBLIOGRAPHY . . . . .	153
GLOSSARY . . . . .	154
INDEX . . . . .	162
